

# Localization Keys Style Guide

## 1. Unified Key Style

we define com's general Key template: "com.module.page.description" base on company's [Localization Guide](#).

like this:

```
{
  "com.marketDataCenter.futures.open.interest": {
    "translation": "Open Interest"
  },
  "com.marketDataCenter.futures.notional.value.open.interest": {
    "translation": "Notional Value of Open Interest:"
  },
  "com.marketDataCenter.futures.top.trader.accounts": {
    "translation": "Top Trader Long/Short Ratio (Accounts)"
  }
}
```

if the key is distributed by the server, please add the prefix “distributed”, 如果这个key是通过服务端下发的, 加distributed

if the key is combined to use, please add the prefix “combined”, this case almost rarely encountered, such as: ( “aaa” + “bbb “). localized. 如果你的key是组合的, 加combined : 比如: ( “aaa” + “bbb “). localized.

like this:

```
{
  "com.distributed.marketDataCenter.futures.open.interest": {
    "translation": "Open Interest"
  },
  "com.combined.marketDataCenter.futures.notional.value.open.interest": {
    "translation": "Notional Value of Open Interest:"
  }
}
```

## 2.Unified module abbreviations

No.	Module Full Name	Module Abbreviation	Sample
1	BinanceHome	home	"com. home"
2	BinanceLite	lite	"com. lite"
3	BNCMarketsModule	market	"com. markets"
4	BNCFundsModule	funds	"com. funds"
5	BinanceTransferModule	transfer	"com. transfer"
6	BNCTransactionsModule	transactions	"com. transactions"
7	BinanceCapitalModule	capital	"com. capital" "com. capital. withdrawal"
8	DepositModule	deposit	"com. deposit"
9	BinanceConvertModule	convert	"com. convert"
10	BinanceLiteTrade	liteTrade	"com. liteTrade"
11	BinanceAccount	account	"com. account"
12	MarketsDataCenterModule	marketDataCenter	"com. marketDataCenter "
13	BNCWebKit	webview	"com. webview"
14	BNCPushService	push	"com. push"
15	AppsModule	apps	"com. apps"
16	ProSearch	proSearch	"com. proSearch"
17	BNCFundingWallet	funding	"com. funding"
18	BNCDiscoverModule	discover	"com. discover"
